TheVall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovationand biosanitary teaching of the Vall d'Hebron University Hospital.Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them aroundthe world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence.**

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers **(Charter & Code)**.

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Data Manager Rare Anemia Disorders European Registry

Rare Anemias Disorders Research Line

The University Hospital Vall d'Hebron is highly specialized in rare diseases on a Regional, national and international level with its recent incorporation as full member of 20 of the 24 European Reference Network (ERN).

The Rare Anaemia Disorders European Epidemiological Platform (RADeep), a project led by a European Consortium and coordinated by VHIR, aims at addressing the lack of recommendations for Rare disease registries implementation and the lack of standards for interoperability in the EU.

RADeep general objective is to map at the European level the diagnosis methods, demography, survival rate, treatments and main clinical features of RAD patients in order to facilitate research on RAD and development of new treatments and clinical trials. Thus, increasing the knowledge and promoting best practices for these rare hematological conditions.

In this context, we are looking for a motivated, self-driven and committed Data Manager who will take reponsibility of the RADeep project in all its aspects related to the collection and exploitation of data in the platform.

JOB DESCRIPTION

Education and qualifications:

Required:

- University degree in area of science (i.e. Biomedical Sciences)
- Fluent (spoken and written) English

Experience and knowledge:

Required:

- Proven experience as data manager (2/3 years) in a Scientific Research related environment
- Ability to understand epidemiological data
- Familiarity with modern database and information system technologies.
- An easygoing person with human qualities, able to interact with physicians.
