I. GENERAL PROVISIONS

CLAUSE 1.- OBJECT, PURPOSE AND LEGAL SYSTEM OF THE FRAMEWORK AGREEMENT

1.1. The purpose of these Specific Administrative Bidding Conditions is to lay down the conditions that will govern the hiring Institutional Framework Agreement with three (3) providers to be contracted by the Unit of Competitive Research Projects or by the Research Groups of the Fundació Hospital Universitari Vall d'Hebron - Institut de Recerca (VHIR) which might require their services and can hire them.

Through this procedure, VHIR will approve those entrepreneurs who keep to the requirements established in this procedure in order to provide the aforementioned services.

1.2 The object of this tender is the award, by the VHIR, of a framework agreement for the subsequent recruitment of the aforementioned services, in accordance with the provisions set forth in this Specification, in the Technical Specification (in forward, PPT) and contracts based on the framework agreement.

The VHIR will hire the necessary services, with the estimated value expected to be an overall and maximum amount, but in no case an amount required to be consumed by the VHIR.

1.3 Approved companies must have sufficient capacity to meet the benefits derived from this tender and, in this regard, have adequate means to cover each one of the VHIR's needs for the execution of every contract based on the framework agreement.

The execution conditions will be specified in accordance with what is established in this Schedule, the PPT and the contracts based.

The VHIR does not guarantee the award of a certain number of contracts based. In the event that the VHIR so requires, you may award the provision of certain services to suppliers that have been approved. Participation in this procedure and the adjudication of the framework agreement does not guarantee or guarantee in favor of that approved provider the subscription of any contract based on its behalf, without this fact giving him the right to be compensated or reimbursed.

Therefore, the non-awarding of any contract based will not entitle the company to have been approved to be reimbursed or compensated.

1.4 The recipient of the services covered by this framework agreement is the VHIR itself, which will, when required, require them to companies approved in accordance with the procedure established in this Specification.

The VHIR will award the contracts based on the procedure established in clause 26 of this Agreement.

1.5 The framework agreement has the following purposes:

- Determine the services that VHIR will be able to hire under this Framework Agreement.
- Establish the minimum technical conditions and the economic conditions related to the awarding companies that will perform the benefits that are the subject of this framework agreement.
- Establish the general conditions of adjudication and execution of the subsequent service contracts through contracting based on and in this framework agreement.
- Limitation framework agreement: This framework agreement is exclusively for awarding contracts based on the estimated values of which do not exceed the maximum unit prices set by the VHIR and that appear in this Specification and in the Technical Specification.

1.6 The framework agreement will conform to the content of this document, whose clauses will be considered an integral part of the respective contract. Likewise, it is reported that the types of contracts that are attached as Annexes to this Schedule regulate the obligations of the contractor, such as, as an indicative and non-limiting, payment method, conditions of execution, subcontracting, payment to subcontractors and suppliers, penalties, resolution of the contract, etc. and that, therefore, they must be taken into consideration by the bidders.

1.7 The presentation of proposals implies the unconditional acceptance by the bidders of the content of this Agreement and of all the documentation that makes up the present invitation, without exception or reservation.

Ignorance of this documentation in any of its terms and other contractual documents of any kind that may be applicable in the execution of the agreed thing, will not exempt the contracting company from the obligation to comply with them.

1.8 The interpretation of the framework agreement and the discrepancies regarding its application will be taken into account, first of all, the specific administrative clauses and technical specifications. In the event of a discrepancy between the provisions of the Specification and the type contract, the provisions in the specifications and PPT will prevail.

In the event that the present document is translated into other languages, in the event of a discrepancy, the version in Catalan will prevail.

1.9 The VHIR is subject to the provisions of Law 9/2017, of November 8, on Public Sector Contracts, by which the European Parliament and Council Directives 2014/23 / EU are transposed into the Spanish legal system. 2014/24 / EU, of February 26, 2014 (hereinafter, "LCSP"), related to the non-harmonized contracting that as adjudicating power that does not have the character of Public Administration is applicable to them.

In relation to the possible contractual modifications that may occur, the regime provided for in subsection 4 of Section 3 of Chapter I of Title I of the LCSP will be applicable.

1.10 The framework agreement formalized has the consideration of private contract and is subject, in terms of its effects and extinction, to the private right, governing by this Specific administrative bidding conditions, by the contract and annexed documentation, and in everything not anticipated, by the applicable civil and mercantile legislation.

1.11 To resolve any discrepancies that may arise from the preparation, adjudication and contractual modifications, when the latter are based on non-compliance with the provisions of articles 204 and 205 of the LCSP, when it is understood that said modification should have been subject to a new adjudication, the parties will be submitted to the contentious administrative court order.

In order to resolve any discrepancies that may arise in relation to the effects and termination of this contract, the parties will submit to the civil jurisdictional order.

CLAUSE 2.- ESTIMATED CONTRACT VALUE, BASE BUDGET FOR FRAMEWORK AGREEMENT AND CONTRACT VALUE

2.1. The estimated maximum value of the Framework Agreement, in accordance with the criteria established in article 101 of the LCSP, has been calculated estimably taking into account the expenditure that could potentially be generated for the entire duration of the LCSP, Framework agreement, taking into account the total number of contracts based on their validity, including any possible form of option and possible extensions.

Therefore, this estimated maximum value has a purely non-binding and non-binding nature, assuming in no case an obligation of expense for the VHIR or that it is obligated to demand a certain amount of services, since it will be determined based on the contracts based on the present framework agreement that is really carried out. Only the obligations actually made by the successful bidder in the contracts based will be generated.

Following these criteria, the estimated maximum value of the framework agreement that is fixed for all its duration, including the possible extension is expressed in **section B of the Table of characteristics** of this tender, amount that does not include Value Added Tax (VAT).

2.2. The maximum unitary prices that are detailed in **Annex no. 1** of this Schedule and the Technical Specification.

The price of the Framework Agreement will be determined based on the percentage of linear loss that bidders apply to unit prices included in the Technical Specification. Bidders may formulate economic offers by improving the **established type of low payment**.

The unit prices that will govern during the execution of the Framework Agreement will be those offered by the successful bidder in their proposal that, in no case, they will be able to exceed the maximum unit prices set by the VHIR and that appear in this Specification and in the Specification of Technical prescriptions.

In this way, offers that present an amount higher than the established prices, as well as those that do not conform to what is specified in the conditions for submission of the offer will be excluded.

The amounts that are detailed as maximum unit prices include all the valuation factors and expenses that, according to the contract documents and current legislation, are borne by the successful bidder, except for the Value Added Tax (VAT) that must support the VHIR.

In the proposals presented by the bidders they will be understood included to all effects the taxes of any type that record the service to carry out, except for the VAT.

The successful bidder of a contract based will have the right to receive the amounts corresponding to the works actually executed, in accordance with their offer and in the manner provided for in the corresponding contract, and which have been requested by the VHIR.

The price of the contract based will not be reviewed.¹

2.3. The adjudication of the contracts based is conditional on the confirmation of the existence of a pertinent economic grant, without the successful bidder being able to claim any compensation in this respect.

2.4. In the contracts based on this framework agreement, the price of the service will be determined based on the supplier's offer and the specific services rendered and actually rendered. The economic offer of the contract based on no case may exceed the prices initially offered by the company when participating in the framework agreement.

CLAUSE 3.- DURATION OF THE FRAMEWORK AGREEMENT AND BASED CONTRACTS

3.1 The Framework Agreement shall have an initial duration of one (1) year, counting from the date fixed in the formalization thereof.

¹ Only the revision of prices could be carried out in the cases established in article 103 of the LCSP (very residual assumptions).

The Framework Agreement may be extended, by express agreement of the VHIR, for a maximum period of twelve (12) additional months. The extension will be agreed by the contracting body of the VHIR and will be obligatory for the successful bidder. The extension will be communicated by VHIR in writing and the company will have to certify the maintenance of the requisite capacity and solvency requirements at the time of the tender. If you do not prove it, you will not be able to benefit from the extension.

If the Framework Agreement could not be extended with the company initially forming part of the framework agreement, the same will expire.

In spite of this maximum duration of the framework agreement, it will be extinguished and will end to all effects at the moment when the estimated amount is depleted.

The termination of the validity of the framework agreement, whether by depletion of the estimated value or due to the fulfillment of the term, will not prevent the continuity of the validity of contracts based on the framework agreement, as long as these contracts based on them have been awarded before the expiration of the framework agreement.

3.2 Regarding the duration of the contracts based on this framework agreement, these may be awarded throughout the entire Agreement of the Framework Agreement.

The duration of contracts based on this framework agreement will be independent of the duration of the framework agreement and will be governed by what is established in the contract based on its duration².

The stipulations of the framework agreement will govern all the based contracts that are adjudicated on this basis.

The natural or legal persons of States not belonging to the European Union must comply, in addition, with the requirements of article 68 of the LCSP.

6.3. Notwithstanding what has been indicated in the previous paragraphs, bidders who, directly or through companies related to them, have participated in the preparation of the technical specifications or the preparatory documents of the contract, can not concur to this tender, if this participation could distort competition or cause restrictions to free competition or suppose a treatment of privilege in relation to the rest of the bidding companies. In any case, the rules set forth in article 70 of the LCSP will be observed.

In the event that a bidding company, or a company linked to it, has participated in the preparation of the technical specifications or preparatory documents of the contract, it must indicate it expressly, specifying what has been its participation in the company, mentioned DEUC.

importance of properly storing this or these keywords (they may be the same for all envelopes or a different one for each) as only bidding companies shall have them (the Digital Envelope tool does not store or save passwords) and they are essential to decrypt submissions and, therefore, to access their contents.

4. The Contract awarding committee shall request bidding companies to access the Digital Envelope web tool to enter their keywords at the appropriate time by sending them an email to the email address stated in the registration form for the Digital Envelope tool.

Once the bidding companies have entered their keywords, the decryption process will begin for the documents, which will be stored in a secure virtual space that guarantees the inaccessibility of the documents before the constitution of the contract awarding committee, as appropriate, and the opening of the envelopes at the stated date and time.

If the documents in question are essential to know or assess the submission, the committee may decide to exclude said company.

Bidding companies may submit a backup copy of submitted digital documents in physical digital format, which will be requested from bidding companies as required in order to access the contents of documents that have been damaged. In this respect it is necessary to keep in mind that it is important not to manipulate these files in order not to alter their digital footprint, which will be checked to ensure the concordance of the documents with the backup copies that have been sent in physical digital format and those that have been sent in the submission through the Digital Envelope tool.
