

Grup de Recerca en: FISIOPATOLOGÍA RENAL. CIBBIM-Nanomedicina

We are currently looking for highly motivated candidates with outstanding academic records to apply for a pre-doctoral research position funded by the Vall d'Hebron Institut de Recerca (VHIR)

The successful candidate will be working in a project focused on kidney pathophysiology, sex hormones and the metabolic syndrome, using genetically modified mice and cell lines, for translational transfer to human clinical research.

CANDIDATE REQUIREMENTS:

-Students with a B.Sc/MSc or equivalent in Biochemistry, Biology, Pharmacy or Medicine with high motivation in research and good knowledge of written and spoken English. The average academic qualification of the B.Sc. or Medical Degree shall be equal or higher than 2 over 4 and the candidates should have finished their studies after January 1, 2008, except in justified instances (see call, at www.vhir.org).

WE OFFER:

- First year fellowship: a gross salary of 15.045,00 euros.
- Contract for three years
- Free-thinking, open, academic and stimulating environment.
