

Entity: Vall d'Hebron Institut de Recerca (VHIR)

Research group, Unit or Department: Neurovascular Research Laboratory- Neurorepair

<http://www.lin-bcn.com/neurorepair-l3/>

Student's tutor: Anna Rosell

Positions available: 1

Project description/ Research lines:

The Master Student will join a research team studying brain neurorepair and potential therapies to enhance neurovascular remodelling and neurogenesis after cerebral ischemia.

Our goal is to study both angiogenesis and neurogenesis in experimental and human studies in order to identify how to potentiate them correctly and to how to improve brain function and neurorecovery after stroke from a translational perspective.

Period for the internship: *November 2015-July 2016*

Requirements:

- Degree in Biomedical Sciences (Biology, Biomedicine, Biotechnology,...)
 - Some experience in cell culture
 - Some experience in the Neuroscience and /r Angiogenesis fields
-

Where to apply: Interested candidates please send (*a letter of intention, CV including a list of lab. skills/techniques and complete academic records*) to Dr. Anna Rosell (anna.rosell@vhir.org)
