

Clinical researcher

The Vall d'Hebron Institute of Research (VHIR) is an institution of the public sector that promotes and develops the biomedical research and innovation of the Vall d'Hebron University Hospital (HUVH), the hospital of Barcelona and the largest one of the Institut Català de la Salut (ICS) (Health Catalan Institute).

The VHIR works to find solutions for the health problems of people, and has the will to contribute to the scientific, educational, social and economic development of our environment. The VHIR needs to fill a temporary vacancy for a Public Procurement technician within Tendering and Purchasing Unit. This Unit gives support and manages all public procurement procedures, as well as the rest of outsourcing of services, acquisition of consumables, purchase of equipment, or other subtypes that are necessary to acquire through research projects and clinical trials developed at the HUVH and VHIR. It intends to manage and supervise the economic and financial resources of VHIR.
