

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**. This recognition proves that VHIR endorses the general principles of the **European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**.

Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply.**

Pre doc researcher

Intensive Care Department/SODIR Research group

The aim of the research group Shock, Organ Dysfunction and Resuscitation (SODIR) is an integral and innovative research in the areas of shock, acute respiratory failure, acute renal failure, organ dysfunction, resuscitation and monitoring the patient in critical condition. In addition, the research group is particularly interested in applying artificial intelligence as a tool to achieve innovative solutions to critical ill patients.

Vall d'Hebron Research Institute (VHIR) is a public sector institution, located in Barcelona (Spain) that promotes and develops innovative biomedical research at the University Hospital Vall d'Hebron. VHIR is oriented towards finding solutions to the health problems of the citizens and has the will to contribute to the scientific, educational, social and economic development within its area of competence around the world.

VHIR offers vacancy/vacant position for half-time postdoc researcher. More information about our group can be found here →
