

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**. This recognition proves that VHIR endorses the general principles of the **European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**. Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply.**

## Clinician researcher Pneumology Research Group

The Pneumology group is looking for a researcher to work in the lung transplant program. The group comprises clinicians and scientists being one of their main goals to bring the benefits of the scientific research undertaken to improve lung transplant patients survival and to develop individualized immunosuppressive regimens to decrease toxicity and side-effects of immunosuppressive therapy.

In this particular The Group of Research in Pneumology offers a contract to work on the project entitled: "Donor-derived cell-free DNA as a non-invasive biomarker after lung transplantation". Graft dysfunction is one of the main causes of death after lung transplantation. The aim of this study is to identify the role of donor-derived cell-free DNA levels in the lung transplant recipient as a non-invasive biomarker of primary graft dysfunction, infection and rejection. Besides, the association of this biomarker with the development of chronic lung allograft dysfunction would be studied.

VHIR offers vacant position for a CLINICIAN RESEARCHER within the Pneumology Research Group. More information can be found here: <http://www.vhir.org/portal1/grup-equip2.asp?t=pneumologia&s=recerca&contentid=187035>

### JOB DESCRIPTION

#### Education and qualifications:

##### Required:

- The candidate has to possess a degree in medicine.
- The candidate must have finished a clinical residency training, specializing in pulmonology.
- Not holding the title of doctor.

#### Experience and knowledge:

##### Required:

- Pulmonologist with experience in lung transplantation.

##### Desired:

- Knowledge of database management

- Organized and methodical person with high motivation and initiative.
- The candidate must have skills to work in team environment and independently.

#### Main responsibilities and duties:

- To develop and maintain a database
- To analyze data
