

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**. This recognition proves that VHIR endorses the general principles of the **European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**. Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply**.

Research Coordinator

Headache Clinical Unit

The **Headache Clinical and Research Group** is a translational research team centered on the study of migraine and other primary headaches. The understanding of migraine biology is approached by studying human and rodents in a multidisciplinary perspective: neurobiology, epigenetic and metabolomic.

The group performs competitive research in the Migraine Adaptive brain Center (MAB), which is a state-of-the-art facility to do psychophysics and electrophysiological studies and collaborates in the development of new drugs through participation in clinical trials to improve the quality of life of patients with Migraine.

In the **Headache Clinical and Research Group** at VHIR we are looking for an Informatics, Biomedical Engineer or Applied Mathematician to develop a robust database and provide statistical and analytical support for our clinical research studies in Headache. More information about our group can be found [here](#).

JOB DESCRIPTION
