

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**. This recognition proves that VHIR endorses the general principles of the **European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**.

Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply.**

Project Manager

Infectious Disease, Tropical Medicine Unit

Project Manager (Part time position) for a project on food security and reduction of chronic malnutrition and mortality in children under 5 years. Experienced Project Manager integrated in the Infectious Diseases research group in Tropical Medicine. The general objective of CRESCER Project is to contribute to the transfer of evidence and knowledge about the effectiveness of different specific and nutrition-sensitive actions in the context of the Angolan crisis during and after the Covid-19 pandemic, to contain malnutrition and reduce child mortality under five in the provinces of Huíla and Cunene.

CRESCER Project aims to determine, through operational research and innovation, the impact of various equitable and scalable, specific and sensitive to nutrition strategies, in reducing malnutrition and mortality of children less than 5 years. To this end, the progress and implementation of FRESAN's multisectoral strategies and projects will be evaluated, as well as their relevance, adequacy, coverage, effectiveness, efficiency, sustainability and scalability that may be the basis for recommendations on future scalable interventions in reducing the indicators of chronic malnutrition in children under 5. More information about our group can be found [here](#).
