

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**. This recognition proves that VHIR endorses the general principles of the **European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**. Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply.**

Clinical researcher

Shock, organ dysfunction and resuscitation

The Shock, organ dysfunction and resuscitation group is a multidisciplinary research team with different lines of research about the critically ill patient. One of these lines is the Acute Respiratory Failure research line, which is interested on the pathophysiology and treatment of acute respiratory failure and acute respiratory distress syndrome. This line coordinates and participates on different international multicenter randomized trials and research projects and wants to incorporate to its teams a Clinical Researcher in Acute Respiratory Failure to give support on research tasks.

VHIR offers vacancy/vacant position for a Clinical researcher within the Shock, organ dysfunction and resuscitation.
