

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

**VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.**

## Clinical associated researcher

### Research Area of Infectious Diseases

The Infectious diseases Group is a multidisciplinary research team that collaborates in the development of new antibiotics, new treatments for HIV and treatments for tuberculosis through participation in clinical trials and research projects to improve the quality of life of patients with infectious diseases.

#### JOB DESCRIPTION

##### Education and qualifications:

##### Required:

- MD PhD degree
- Specialist in Internal Medicine
- Clinical training in Infectious Diseases (at least 3 years)
- Experience in the diagnosis and treatment of infections in oncohematologic patients
- Ability to prepare and conduct research projects

##### Desired:

- Good level in spoken and written English (C1 level)
- Good computer skills (Word, Excel, Access, SPSS or similar, webpage, webmail).
