

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

Candidate. Research Fellow

Group: Digestive and liver diseases. Neurophysiology and neurophysiopathology of the digestive tract

Vall d'Hebron Research Institute (VHIR) is a public sector institution, located in Barcelona (Spain) that promotes and develops innovative biomedical research at the University Hospital Vall d'Hebron. VHIR is oriented towards finding solutions to the health problems of the citizens and has the will to contribute to the scientific, educational, social and economic development within its area of competence around the world.

In the Physiology and Pathophysiology of the Digestive Tract group, the gastroenterology line investigates the integrated function of the intestinal tract including secretion, motility and absorption in health and disease. It also studies the interactions of intestinal inflammation with some aspects of enteric flora in inflammatory bowel disease.

VHIR offers vacancy position for a research fellow within the **Digestive and liver diseases. Neurophysiology and neurophysiopathology of the digestive tract.**

More information can be found [here](#).
