

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Laboratory technician

Psychiatry, Mental Health and Addictions Research Group

The **Group of Psychiatry, Mental Health and Addictions** is seeking a laboratory technician to work on neurodevelopmental disorders, including attention deficit and hyperactivity disorder (ADHD) and autism spectrum disorder (ASD).

Neurodevelopmental disorders are highly heritable, comorbid, have substantial diagnostic overlap and share clinical features and genetic etiology. Genetic studies continue to identify hundreds of genetic associations with neuropsychiatric disorders, however translating these into causal genes or variants, biological mechanisms, and therapeutic targets remains a major challenge.

The candidate will join the **Psychiatric Genetic Unit**, a lab dedicated to understand the genetics of psychiatric disorders in children and adults with the ultimate goal to identify biomarkers for disease. We are involved in genotyping, gene and microRNA expression, epigenetics and microbiome analyses and are looking for a motivated research technician to work alongside our scientists to help elucidate the genetic and psychological landscape of these poorly understood conditions.

JOB DESCRIPTION

Education and qualifications:

Required:

- Lab technician or Bachelor's Degree in Sciences.
- Previous experience in biochemical techniques and molecular biology.

Desired:

- Good communication skills and fluency in written and spoken English.

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Experience and knowledge:

Required:

- Well-organized and hardworking.
- High motivation.
- Proactive and motivated person, capable of setting and meeting deadlines and delivering outputs to the required standard.
- Strong organization and team-working skills.
- Team Player and critical thinker.
- Ability to work independently

Main responsibilities and duties:

The ideal candidate will have an understanding of molecular biology and basic laboratory techniques.

Primary tasks and responsibilities include but are not limited to:

- Receiving and logging blood and saliva samples.
- DNA/RNA/microRNA extraction from fresh tissues.
- Performing DNA/RNA quality control and curating the resulting genomic DNA/RNA.
- Maintaining of the DNA and RNA collections.
- Maintaining computerized sample tracking database.
- Maintaining and ordering stocks, supplies and reagents (kits, plastics, supplies).
- Maintaining equipment.

Labour conditions:

- Full-time: 40h/week.

- Starting date: immediate.
- Gross annual salary: 18.589€
- Contract: *permanent linked to project*

What can we offer?

- Incorporation to Vall d'Hebron Research Institute (VHIR), a public sector institution that promotes and develops the biomedical research, innovation and teaching at Vall d'Hebron University Hospital (HUVH), the biggest hospital of Barcelona and the largest of Catalan Institute of Health (ICS).
- A scientific environment of excellence, highly dynamic, where high-end biomedical projects are continuously developed.
- Continuous learning and a wide range of responsibilities within a stimulating work environment.
- Personal training opportunities.
- Flexible working hours.
- 23 days of holidays + 9 personal days.
- Flexible Remuneration Program (including dining checks, health insurance, transportation and more).

How to apply:

Applicants should submit a full Curriculum Vitae and a cover letter with the reference "Laboratory Technician job offer" to the following email addresses: marta.ribases@vhir.org, raquel.ibarz@vhir.org and seleccio@vhir.org before 22/05/2023
