

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Laboratory Technician

Biomedical Research in Urology

The Research Group in Urology is a multidisciplinary group formed by clinical specialists in Urology, Oncology, Pathology and Basic Researchers with extensive experience in the biology of prostate, renal, and bladder cancer. The collaboration between clinicians and basic researchers allows for an easier identification of unresolved issues in the current treatments/management of patients with urologic diseases. This approach permits the application of strategies that starting from specific clinical aspects study the molecular mechanisms at the base of disease progression. A deeper understanding of the pathways involved in the progression of these cancers is necessary to advance in the development of preventive and curative treatment strategies.

Contract linked to the project “TARTAGLIA: Red Federada de Inteligencia Artificial para acelerar la Investigación Sanitaria”. Funding by Ministerio de Asuntos Económicos y Transformación Digital within NextGeneration funds.

JOB DESCRIPTION

Education and qualifications:

Required:

- FP-II/CFGS (laboratory technician or similar)

Desired:

- Fluency in Catalan, Spanish, English.

Experience and knowledge:

- Technical experience in a laboratory.
- Experience in similar positions in other national or international research organizations.
