

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Researcher in cardiovascular imaging

Cardiovascular Imaging Research Group

VHIR offers a position for a candidate researcher within the Cardiovascular Diseases Research group for research in aortic diseases

JOB DESCRIPTION

Education and qualifications:

Required:

- Master Degree in Biomedical Engineering, Medical Imaging, Biomedical Research or related topics
- Bachelor's Degree in Biomedical Engineering, Physics or related topics

Desired:

- Fluency in Catalan, Spanish, English (business level)

Experience and knowledge:

Required:

- Experience programming in Matlab
- Experience in medical imaging analysis
- Experience in 3D image segmentation.
- Experience in image registration.

Desired:

- Previous experience in medical research, preferably in a clinical environment.

As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

- Previous experience in CT imaging.
- Experience in open software for image segmentation and registration.
- Motivation for clinical research with advanced imaging

Main responsibilities and duties:

- Research in cardiovascular image analysis
- Development of Matlab codes for advance imaging analysis.
- Statistical analysis
- Scientific report of results (abstracts, research manuscripts)
- Maintaining a strict collaboration with engineers and clinical researchers of the cardiovascular imaging unit.

Labour conditions:

- Full-time position: 40h/week.
- Starting date: September, 2023.
- Gross annual salary: 21.276,7 euros (Salary ranges are consistent with our Collective Agreement pay scale)
- Contract: *permanent linked to project*

What can we offer?

- Incorporation to Vall d'Hebron Research Institute (VHIR), a public sector institution that promotes and develops the biomedical research, innovation and teaching at Vall d'Hebron University Hospital (HUVH), the biggest hospital of Barcelona and the largest of Catalan Institute of Health (ICS).
- A scientific environment of excellence, highly dynamic, where high-end biomedical projects are continuously developed.
- Continuous learning and a wide range of responsibilities within a stimulating work environment.
- Individual training opportunities.
