

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Research Support Technician

Statistic & Bioinformatics Unit (VHIR)

The Statistics and Bioinformatics Unit (UEB) opens a selection process to incorporate a **Bioinformatics Technician** associated with the IMPACT project. The role of the UEB is to support basic and clinical researchers, mainly from the Campus Vall d'Hebron. This is done primarily through data analysis services, participation in clinical trials, and data management services, and bioinformatics data analyses. The unit also offers advice and training on statistics and bioinformatics. The selected person will be responsible of the implementation and testing of several bioinformatics and data-science tools created as by-products of the IMPACT project. She will also be involved in ordinary UEB activities such as supporting researchers or participating in studies

JOB DESCRIPTION

Education and qualifications:

Required:

- Bachelor's degree in bioinformatics. Degrees in other life-science or computer-science disciplines with complementary training in bioinformatics are also welcome.
- Fluency in Spanish and English

Desired:

- Completed or ongoing postgraduate training in Data Science or related disciplines (Omics Data Analysis, Bioinformatics, Biostatistics)

Experience and knowledge:

Required:

- No prior experience required...

Desired:

- Background and (or experience) in Omics Data Analysis and Machine learning
- Background and or experience in project management
- Background in human and or animal physiology

Main responsibilities and duties:

- Recapitulate ongoing work from finished and ongoing data science projects mainly IMPACT.
- Deploy and test data-science tools generated during the IMPACT project.
- Provide assistance in data analysis related tasks.

Labour conditions:

- Full-time position: 40h/week.
- Starting date: immediate (after selection process is complete)
- Salary: Salary ranges are consistent with our Collective Agreement pay scale
- Contract: permanent linked to project

What can we offer?

- Incorporation to Vall d'Hebron Research Institute (VHIR), a public sector institution that promotes and develops the biomedical research, innovation and teaching at Vall d'Hebron University Hospital (HUVH), the biggest hospital of Barcelona and the largest of Catalan Institute of Health (ICS).
- A scientific environment of excellence, highly dynamic, where high-end biomedical projects are continuously developed.
- Continuous learning and a wide range of responsibilities within a stimulating work environment.
- Individual training opportunities.
