

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**. This recognition proves that VHIR endorses the general principles of the **European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**.

Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply.**

## Research Technician-FPII Research Group on Neuromuscular and Mitochondrial Diseases

VHIR offers a vacant position for a Laboratory Technician within the Research group on neuromuscular and mitochondrial diseases

### JOB DESCRIPTION

#### Education and qualifications:

##### Required:

- FPII degree or equivalent in the biomedical field.
- Official certificate enabling work with experimental animals (mice).

#### Experience and knowledge:

##### Required:

- Experience in management of mouse colonies (maintenance, breeding, labeling, genotyping, basic procedures).
- Social abilities for fluent collaborative work.

##### Desired:

- Experience in cell culture work.
- Experience in molecular biology methodology (extraction of nucleic acids, routine biochemical methods, etc.)
- English and Catalan language.

#### Main responsibilities and duties (including, but not limited to):

- Management of several mouse colonies related with different research lines (maintenance, breeding, labeling, genotyping, oral drug administration, basic procedures).
- Cell culture duties.
- Different tasks and technical support duties in the frame of projects developed in the research group.

- Support in lab management.
- Mandatory social abilities for fluent collaborative work.

### Labour conditions:

- Full-time position (40h/week) for one year.
- Gross annual salary of 18.589,05 €.
- Integration in a research group.
- Authorship in publications when relevant and original contribution to the results.

### What can we offer?

- Skilful and social colleagues in a dynamic environment.
- Challenging tasks and a wide range of responsibilities.
- Personal training opportunities.
- Flexible working hours.
- 23 days of holidays + 9 personal days.
- Flexible Remuneration Program (including dining checks, health insurance, transportation and more).
- Annual teambuilding events

### How to apply:

Applicants should submit the following documentation to the following email addresses: [ramon.marti@vhir.org](mailto:ramon.marti@vhir.org) and [seleccio@vhir.org](mailto:seleccio@vhir.org), with the Reference: "**Tècnic de recerca – patologia mitocondrial 2021**".

- Cover letter.
- Full Curriculum Vitae.
- Title of FPII academic degree.
- Official certificate enabling work with experimental animals.
- Documents demonstrating all other merits claimed in the submission.
- Reference/recommendation letters, and/or contact details of colleagues that can give well justified references of the applicant.
