

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Research technician Neurovascular Research Laboratory

VHIR's offers a contract to work as a Research Technician-Animal Models within the Neurovascular Research Group. Our lab is focused in stroke research from a basic and translational point of view. The group is composed by a young and highly motivated group of researchers: neurologists, biologists, technicians, statisticians, psychologists and nurses. Our work is divided into four lines of research: Biomarkers, Prevention, Neurorepair and Amyloid. This position will give support to several studies within the **RICORS program**.

JOB DESCRIPTION

Education and qualifications:

Required:

- Bachelor's Degree in Neuroscience, Health Sciences or similar (Biology, Biomedicine, etc.)
- Certificate in Laboratory Animal Science & Experimentation (Level C or D)

Desired:

- Fluent English

Experience and knowledge:

Required:

- Previous experience in a biomedical research laboratory
- Previous experience in animal models or animal surgeries
- Experience in collection, storage and tissue sample processing
- Computer skills and experience in basic data representation and statistical analysis
- Personal skills: well-organized, methodical, proactive and aptitude for teamwork

Desired:

- Experience in Cerebral Ischemia Models

- Experience in mouse colony management
- Experience in Cell and Molecular Biology Techniques

Main responsibilities and duties:

- Animal Models, surgeries and colony management.
- General maintenance of animal experimentation supplies.
- Tissue sample handling and processing
- Genotyping, ELISA, Protein Arrays, Cytometry, Cell & Molecular Biology Techniques
- Writing reports, statistical analyses and results interpretation

Labour conditions:

- Full-time position: 40h/week.
- Starting date: February 2022
- Gross annual salary: 22.806 euros.
- Contract: temporary, linked to a 3 years project.

What can we offer?

- Incorporation to Vall d'Hebron Research Institute (VHIR), a public sector institution that promotes and develops the biomedical research, innovation and teaching at Vall d'Hebron University Hospital (HUVH), the biggest hospital of Barcelona and the largest of Catalan Institute of Health (ICS).
- A scientific environment, highly dynamic, where biomedical projects are continuously developed.
- Continuous learning and a wide range of responsibilities within a stimulating work environment.
- Personal training opportunities.
- 23 days of holidays + 9 personal days.
- Flexible Remuneration Program (including dining checks, health insurance, transportation and more).
