

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

**VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.**

## Researcher Technician

### Hepato-bilio-pancreatic surgery (HBP) and liver transplantation

Until 2017, this group was constituted as a consolidated group in the VHIR under the name of "Digestive Transplants" with a consolidated research trajectory. Our group has two large areas of research: liver transplantation, which is cross-sectional adult-pediatric and; on the other hand, research, specifically in the fields of liver resections, liver cancer (primary or metastatic), biliary cancer, pancreatic cancer and pancreatitis. Both areas have very innovative aspects, with translational objectives, including artificial intelligence, transcriptomics and molecular biology.

The general objective of the liver transplant research area is to improve the preservation of liver grafts, as well as increase the survival of grafts and transplant patients. The research area related to cancer or acute pancreatitis has as a general objective to improve the management and treatment of patients with pancreatitis, as well as to improve the diagnosis and survival of cancer patients.

### JOB DESCRIPTION: DATA MANAGER

#### Education and qualifications:

#### Required:

- Training in Liver Transplantation data managing.

#### Desired:

- Training in Liver Transplantation data managing.
- Fluency in Catalan, Spanish and English (business level).
