

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

Study Coordinator

Neurovascular diseases group

Vall d'Hebron Research Institute (VHIR) is a public sector institution located in Barcelona (Spain) that promotes and undertakes innovative biomedical research at the University Hospital Vall d'Hebron. VHIR is focused on finding solutions to the health problems of citizens, and aims to contribute to scientific, educational, social and economic development within its specialist fields around the world.

Neurovascular diseases group objectives are to investigate the causes of stroke and dementia (vascular, primary neurodegenerative and multiple cause), and develop new therapies for these diseases, whose health impact is very high, given its high prevalence and years of life lost associated with disability. Our research is built around the identification of new therapeutic targets for neuroprotection and neurorepair, the identification of diagnostic and prognostic biomarkers in both biological fluids and neuroimaging and the study of the mechanisms of neuronal and vascular damage, in preclinical models of stroke, cerebral amyloidosis and Alzheimer's disease. We participate in clinical trials in Alzheimer's and other neurodegenerative diseases.

VHIR offers a vacant position for a Study Coordinator to work on the project "A multicenter, prospective, non-interventional study to determine the cut off and clinical performance of the Elecsys® Amyloid Plasma Panel and its component assays"

JOB DESCRIPTION

Education and qualifications:

Required:

- Bachelor's Degree in Psychology
- Master in Neuropsychology

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.
