

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

TECHNICIAN FOR THE CYTOMETRY PLATFORM HIGH TECHNOLOGY UNIT (UAT)

VHIR offers a position of a **Technician of the Cytometry Platform** of the High Technology Unit (UAT). The UAT belongs to the VHIR pre-clinical core-facilities, providing highly specialized equipment along with scientific and technical expertise to assist researchers in experimental design and data analysis. UAT portfolio comprises Cytometry, Microscopy, Genomics, Metabolomics and Molecular Diagnosis services. In addition, UAT collaborates with other VHIR core-facilities giving support to biomedical research projects and manages specialized training and teaching activities.

The Cytometry Platform currently comprises a conventional analyzer cytometer (Fortessa, BD), a conventional cell sorter (FacsAria, BD), a spectral 5-laser cell analyser (Aurora, Cytek) and a spectral 5-laser cell sorter (Aurora CS, Cytek). It also offers a compact multiplexing reader (Luminex Magpix), as well as data analysis stations equipped with specific software for conventional and high-dimensional flow cytometry data (FlowJo, OMIQ, FACSDiva).

The aim of this Platform is to provide high-quality services to research groups from Vall d'Hebron Campus, and to external users.

UAT works under the requirements of the Quality Management System ISO9001:2015.

More information about UAT services can be found in the VHIR webpage.

JOB DESCRIPTION

Education and qualifications:

Required:

- University Degree in Life Sciences
- Good communication skills

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

- Fluid written and spoken Spanish, English and Catalan.

Desired:

- MSc in Life Sciences.
- Specific training in Immunology.

Experience and knowledge:

Required:

- Theoretical knowledge of cytometry principles.
- Proven experience in cell culture, protocols and sample preparation techniques most commonly used in cytometry.
- Experience (user's level) in the use of analytical cytometers.
- Basic knowledge of cell sorting principles (user's level).
- Experience in analyzing cytometry data using specific software (ex. FlowJo)
- Strong customer orientation.
- Good team player.
- Proactive, rigorous, organized person able to work autonomously, committed to the tasks required by the position.
- Willing to learn, flexibility, adaptability and resilience.

The following fields will be valued:

- Previous experience working as a technician in a cytometry core-facility, being in charge of handling and maintaining cytometers and performing quality controls (in both analysers and sorters) will be highly valued.

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

HR EXCELLENCE IN RESEARCH

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (**Charter & Code**).

VHIR embraces Equality and Diversity. As reflected in our values we work toward ensuring inclusion and equal opportunity in recruitment, hiring, training, and management for all staff within the organization, regardless of gender, civil status, family status, sexual orientation, religion, age, disability or race.

- Expertise in full-spectrum cytometry, including experience in panel design, sample acquisition, quality controls and analysis, will be highly considered.
- Knowledge/experience working under a quality management systems (mainly ISO9001:2015).

Main responsibilities and duties:

The main responsibility of the selected candidate will be to support the Cytometry Platform specific activities, under the supervision of the Platform Manager. Main activities to be performed will be:

- Perform the optimal set up and daily maintenance of the equipment.
- Support the facility users in all kind of issues related to cytometry: experimental design, budgeting, technical performance and data analysis.
- Operate the equipment in technician-assisted experiments using any of the UAT cytometers.
- Initial training and on-demand assistance to self-service users. Implementation of SOPs.
- Management and registration of the preventive and corrective maintenance of the equipment, under the established quality procedures. Management of breakdowns through external technical assistance services.
- Managing and procuring the consumable materials required for the quality control and operation of the machines.
- Development of new cytometry protocols, according to the necessities of each particular research project. Implementation of new equipment, as required.
- Administrative management of the Platform activity (bookings, quotations, billing).
- Ensure that all the platform activities are carried out in accordance with the requirements established in the procedures of the Quality System of the Unit (ISO9001:2015). Promote and launch continuous improvement actions. Write and keep actualized written documentation (protocols, procedures, etc.) and registers.
- Promote, organize and participate in teaching activities organized by the Unit or in those in which the UAT is involved.

- Any other duties related to the job as requested to contribute to the general functioning of the High Technology Unit.

Labour conditions:

- Full-time position: 40 h/week.
- Starting date: immediate.
- Gross annual salary: Remuneration will depend on experience and skills. Salary ranges are consistent with our Collective Agreement pay scale.
- Contract: permanent linked to a project

What can we offer?

- Incorporation to Vall d'Hebron Research Institute (VHIR), a public sector institution that promotes and develops the biomedical research, innovation and teaching at Vall d'Hebron University Hospital (HUVH), the biggest hospital of Barcelona and the largest of Catalan Institute of Health (ICS).
- A scientific environment of excellence, highly dynamic, where high-end biomedical projects are continuously developed.
- Continuous learning and a wide range of responsibilities within a stimulating work environment.
- Individual training opportunities.
- Flexible working hours.
- 23 days of holidays + 9 personal days.
- Flexible Remuneration Program (including dining checks, health insurance, transportation and more)
- Corporate Benefits: platform through which you can obtain significant discounts on travel, culture, technology, gastronomy, sports... among many others.
